

## TREE

We need a manual auger to drill a 40cm deep hole in the ground.

---

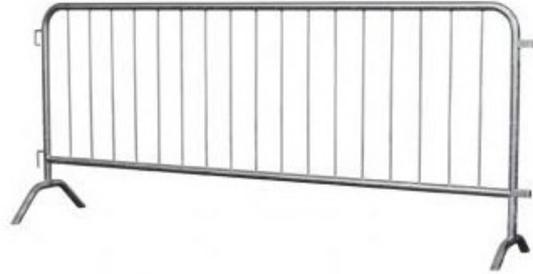

## SAND

We need 10 sand bags, 25kg each to prepare the bedding for the fire skeleton and to make the bases of the 3 big wooden doors.

## FENCES

We use a specific “charkle poi staff” during the show. To get it ready we have to set up to two fire points from the beginning of the show somewhere in the backstage, far from the acting space.

We need 3-4 fences to block that aerea.

---

## SOFT - SURFACE

We need to play on a soft surface since we have several props we need to insert into the ground. See numbers, fire letters, torches, fire umbrellas and so on.
